

Amendment to the Claims:

The listing of claims will replace all prior versions, and listings of claims in the application:

Listing of Claims:

1. (Currently Amended) A method of using a terminal having a display, said method comprising:

accessing a first application using said terminal;

displaying said first application on said display;

displaying features of said first application within a selected first active window of said terminal;

accessing a second application using the terminal, displaying said second application on said display and displaying features of said second application within a selected second active window of said terminal; and wherein

accessing the second application results in said features of said first application being transformed to be displayed within a non-selected first active window of said terminal- and said non-selected first window is a shrunken image of said selected first active window and features of said shrunken image as updated in a real time manner

2. (Original) The method of claim 1, wherein said displayed features of said first application comprise a visual representation of said first application.

3. (Original) The method of claim 1, wherein said displayed features of said first application is one of system services applications.

4. (Original) The method of claim 3, wherein said system service application is one of a calendar, an e-mail and a notice board.

5. (Currently Amended) The method of claim 2, wherein said displayed features further comprise a URL link of said first application when the first application is a browser for internet browsing.

6. Cancelled - Without disclaimer or prejudice.

7. (Currently Amended) The method of claim1, further comprising displaying features of said second application within a second active window of said terminal while displaying said features of the first application within ~~said-a~~ a first active window.

8. (Previously Presented) The method of claim1, wherein the second application is a browser for internet browsing.

9. (Currently Amended) The method of claim1, wherein the second application is one of a system service application comprising one of a calendar, an e-mail and a notice board.

10. (Currently Amended) The method of claim 1, further comprising:
selecting said first active window;
reaccessing the first application after selecting said a first active window; and
displaying said first application on said display after selecting said first active window.

11. (Currently Amended) The method of claim 1, further comprising
relocating a position of said a first active window within said display.

12. (Currently Amended) A method of using a terminal having a display, said method comprising:

displaying a first application on said display including displaying features of said first application within a selected first active window on said display;

displaying a second application on said display including displaying features of a second application within a selected second window on said display; wherein

accessing a second application using the terminal, displaying said second application on said display and displaying features of said second application within a selected second active window of said terminal; and wherein

accessing the second application results in said features of said first application being transformed from the first active window to within a non-selected first active window of said terminal and said non-selected first window is a shrunken image of said selected first active window and features of said shrunken image are updated in a real time manner.

13. (Original) The method of claim 12, wherein said displayed features of said first application comprise a visual representation of said first application.

14. (Original) The method of claim 13, wherein said displayed features further comprise a URL link of said first application when the first application is a browser for internet browsing.

15. (Original) The method of claim 13, wherein said displayed features further comprise a partial view of the first application.

16. (Currently Amended) The method of claim 12, further comprising:
selecting said a first window;
accessing said first application after selecting said first window; and
displaying said first application on said display after selecting said first window.

17. (Original) The method of claim 16, further comprising:
selecting said second window subsequent to displaying said first application;
accessing said second application after selecting said second window; and
displaying said second application on said display after selecting said second window.

18. (Original) The method of claim 16, wherein the first application is one of an internet browser, a calendar, an e-mail and a notice board.

19. (Original) The method of claim 16, wherein the second application is one of an internet browser, a calendar, an e-mail and a notice board.

20. (Currently Amended) A terminal for accessing an application comprising:
a browser that accesses at least a server;
a display device coupled to the browser to display a view of a first application;
a user interface device coupled to the display device that allows a user to interact with items displayed on said display device to display on the display a first application including features of said first application within a first active window of said display device;

~~accessing a second application which is accessed using the terminal, and displaying said second application on said display displays said second application including, and displaying features of said second application within a selected second active window of said terminal; and wherein~~

~~accessing the second application which is accessed by the terminal results in said display of features of said first application being transformed from the first active window to within a non-selected first active window of said terminal, and said non-selected first window is a shrunken image of said selected first active window and features of said shrunken image are updated in a real time manner~~

21. (Original) The terminal of claim 20, wherein said displayed features of said first application comprise a visual representation of said view of said first application.

22. (Original) The terminal of claim 20, wherein said displayed features further comprise a URL link of said first application when the first application is a browser for internet browsing.

23. (Original) The terminal of claim 20, wherein said displayed features are one of calendar, e-mail and notice board for said first application.

24-25. Cancelled - Without disclaimer or prejudice.

26. (Original) The terminal of claim 20, wherein said user interface device is used to select said first active window, said browser re-accessing the first application based on said selection, and said display device displays said view of said first application after said selection of said first active window.

27. (Original) The terminal of claim 20, wherein said user interface device allows a user to relocate a position of said first active window within said display device.

28. (Currently Amended) A terminal for accessing application services, said terminal comprising a display device and a controller coupled to said display device so as to control items displayed on said display device to display on the display a first application including features of said first application within a selected first active window on said display device and to display features of a second application within a selected second active window on said display device;

~~accessing a second application which is accessed using the terminal, displaying said second application on said display displays said second application including, and displaying features of said second application within a selected second active window of said terminal; and wherein~~

~~accessing the second application which is accessed by the terminal results in said display of features of said first application being transformed from the first active window to within a non-selected first active window of said terminal, and said non-selected first window is a shrunken image of said selected first active window and features of said shrunken image are updated in a real time manner.~~

29. (Original) The terminal of claim 28, wherein said displayed features of said first application comprise a visual representation of said first application.

30. (Original) The terminal of claim 29, wherein said displayed features further comprise a URL link of said first application when the first application is a browser for internet browsing.

31. (Original) The terminal of claim 28, wherein said displayed features comprise one of calendar, e-mail and notice board, for said first application.

32. (Currently Amended) The terminal of claim 28, further comprising a user interface device to allow a user to select ~~said a~~ first window, wherein said controller uses a browser to access said first application after selecting said first window and said display device displays said first application after selection of said first window.

33. (Original) The terminal of claim 32, wherein said user interface device allows a user to select said second window subsequent to said display device displaying said first application, wherein said controller uses a browser to access said second application after selecting said second window and said display device displays said second application after the selection of said second window.

34. Cancelled (without disclaimer or prejudice).

35. (Previously Presented) The method of claim 1 wherein:
said non-selected first active window is a partial image of said selected first active window.

36. (Currently Amended) The method of claim 1 wherein:
said non-selected first active window is presented on said display while ~~said a~~ selected personal active window is presented.

37. Cancelled (without disclaimer or prejudice).

38. (Currently Amended) ~~The method of claim 34 wherein:~~

A method of using a terminal having a display, said method comprising:

accessing a first application using said terminal;

displaying said first application on said display;

displaying features of said first application within a selected first active window of said terminal;

accessing a second application using the terminal, displaying said second application on said display and displaying features of said second application within a selected second active window of said terminal; and wherein

accessing the second application results in said features of said first application being transformed to be displayed within a non-selected first active window of said terminal and said non-selected first window is a shrunken image of said selected first active window and features of said shrunken image as updated in a real time manner; and

features of said shrunken images are updated in a periodical manner.

39. Cancelled (without disclaimer or prejudice).

40. (Previously Presented) The terminal of claim 20 wherein:

said non-selected first active window is a partial image of said selected first active window.

41. (Previously Presented) The terminal of claim 39 wherein:

said non-selected first active window is presented on said display while said selected personal active window is presented.

42. Cancelled (without disclaimer or prejudice).

43. (Currently Amended) ~~The terminal of claim 39 wherein:~~

A terminal for accessing an application comprising:

a browser that accesses at least a server;

a display device coupled to the browser to display a view of a first application;

a user interface device coupled to the display device that allows a user to interact with items displayed on said display device to display on the display a first application including features of said first application within a first active window of said display device;

a second application which is accessed using the terminal and said display displays said second application including features of said second application within a selected second active window of said terminal;

the second application which is accessed by the terminal results in said display of features of said first application being transformed from the first active window to within a non-selected first active window and said non-selected first window is a shrunken image of said selected first active window and features of said shrunken image are updated in a real time manner;

said non-selected first active window is a shrunken image of said selected first active window; and

features of said shrunken image are updated in a periodical manner.

44. Cancelled (without disclaimer or prejudice).

45. (Previously Presented) The terminal of claim 28 wherein:

said non-selected first active window is a partial image of said selected first active window.

46. (Currently Amended) The terminal of claim 44 wherein:

said non-selected first active window is presented on said display while said a selected personal active window is presented.

47-48. Cancelled

49. (Previously Presented) A method in accordance with claim 1 wherein the non-selected first active window comprises a display of a URL address of a selected web page, and a display of content from the web page.

50. (Previously Presented) The method of claim 49 wherein the non-selected first active window comprises a view of the web page and a title of said web page.

51. (Previously Presented) A method in accordance with claim 12 wherein the non-selected first active window comprises a display of a URL address of a selected web page, and a display of content from the web page.

52. (Previously Presented) The method of claim 51 wherein the non-selected first active window comprises a view of the web page and a title of said web page.

53. (Previously Presented) A terminal in accordance with claim 20 wherein the non-selected first active window comprises a display of a URL address of a selected web page, and a display of content from the web page.

54. (Previously Presented) A terminal in accordance with claim 53 wherein the non-selected first active window comprises a view of the web page and a title of said web page.

55. (Previously Presented) A terminal in accordance with claim 28 wherein the non-selected first active window comprises a display of a URL address of a selected web page, and a display of content from the web page.

56. Cancelled (without disclaimer or prejudice).

57. (New) A computer program stored on a storage medium for use in a terminal for accessing application services, said terminal comprising a display device and a controller coupled to said display device so as to control items displayed on said display device to display on the display a first application including features of said first application within a selected first active window on said display device and

to display features of a second application within a selected second active window on said display device which, when executed by the controller, performs a method on the terminal comprising:

accessing a second application and said display displays said second application including features of said second application within a selected second active window of said terminal; and

accessing the second application to cause said display of features of said first application being transformed from the first active window to within a non-selected first active window and said non-selected first window is a shrunken image of said selected first active window and features of said shrunken image are updated in a real time manner.
